City of Westerville Electric Division
Electric Rates

Schedule GSL – Schools: General Service Large – Schools

1) Availability. Available to public and private schools with programs through high school with maximum demands generally greater than 50 kilowatts (kW).

2) Rates.

All kW of Maximum Demand	$9.90 per kW
Reactive Demand Charge: All kVar of Maximum Reactive Demand	$0.50 per kVar
Energy Charge: All kilowatt-hours (kWh)	$0.02532 per kWh

3) Determination of Maximum Demand. The Maximum Demand shall be the sum of the individual demands of each metered service. The individual demand shall be determined by one of the following methods, at the option of the City:
   a) The highest registration of a thermal type demand meter.
   b) The maximum thirty minute integrated kilowatt demand recording of an integrating demand meter.

4) Determination of Maximum Reactive Demand. The Maximum Reactive Demand shall be the sum of the individual reactive demands of each metered service. The individual reactive demand shall be determined by one of the following methods, at the option of the City:
   a) The highest registration of a thermal type demand meter.
   b) The maximum thirty minute integrated kilovolt-ampere demand recording of an integrating demand meter.

5) Power Supply Cost Adjustment Charge. In addition to the monthly rates established in subsection (2) hereof, each consumer shall pay a Power Supply Cost Adjustment Charge established by the City Manager. The Power Supply Cost Adjustment Charge applicable to the rates set forth herein shall be set administratively by the City Manager on the recommendation of the Director of Finance and the Electric Utility Manager. The City Manager is hereby authorized and directed to review the Power Supply Cost Adjustment Charge not less than once each year. The City Manager may adjust the Power Supply Cost Adjustment Charge to reflect any anticipated increase or decrease in the City's cost of power from its suppliers or self-owned generation, or any past over or under recovery of power supply costs, provided City Council, after first being provided at least ten (10) days advance written notice, does not object. The Power Supply Cost Adjustment Charge shall not include power supply costs specifically recovered through any renewable energy or other similar special rate offered by the City. For bills rendered after December 31, 2011, the Power Supply Cost Adjustment charge is $0.04188 per kilowatt-hour.

6) Service and Contract Provisions. Upon accepting electric service from the City of

Schedule GSL – Schools: General Service Large – Schools

Westerville the consumer agrees to the City's Terms and Conditions of Service. A copy of the Terms and Conditions of Service will be made available upon request. A written agreement may, at the City's option, be required.

7) Length of Term. The length of term for service under this schedule shall be no less than one year.

8) Discount. A discount of sixty cents ($0.60) per kW of Maximum Demand shall be allowed for any consumer that owns and maintains transformation and distribution facilities, acceptable to the City.

9) Metered Voltage. This rate is based upon delivery and measurement of energy at the same voltage, thus measurement will be made at or compensated to the delivery voltage. Determination of the measurement voltage shall be at the sole discretion of the City. Measurements taken at the low-side of a consumer-owned transformer shall be multiplied by 1.01.

10) Payment. Bills are due and payable in full on the fifteenth of each month.
