Mid-Ohio Regional Planning Commission (MORPC)
Housing Preferences Are Changing

According to the survey, the majority of Americans, 53 percent, would prefer to live in communities containing houses with small yards but within easy walking distance of the community’s amenities, as opposed to living in communities with houses that have large yards but they have to drive to all amenities. This up from 48 percent in 2015.

What does a regional housing strategy look like?

• Cross-sector, regional framework
  • Measurement plan identifies key metrics and milestones
  • Tracks progress over time
  • Aligns recommendations with existing, available, and new/proposed funding sources via a Housing Allocation Portfolio
  • Develops Local Housing Action Agendas to demonstrate how the regional framework can be implemented locally (via policy, investments, and local partnerships)
Project Scope

Community Engagement

- **Central Ohio Landscape Scan**: Review & synthesize past reports
- Review & synthesize housing strategies, plans, policies from around the country
- Centralize known datasets & analyze for findings
Project Scope

Community Engagement

- Elevate community voices
- Interviews, surveys, focus groups, workshops
- Highlight successes and innovation
Project Scope

- Housing typology analysis & opportunity mapping
- Account for varying market conditions, priorities, and capacity for implementation
- Evaluate market viability & scalability for specific strategies
Project Scope

Community Engagement

- Identify impediments to housing development
- Review & analyze current public and private financial support for affordable housing
- Identify context-sensitive funding and regulatory strategies
Engagement Process
Planned Public Involvement

- Focus Groups
- Speaker Series
- Interviews & Surveys
- Regional Workshops
## Guiding Priorities

### Data/Info

- What does attainable housing look like?
- What are the opportunities for coordination?
- What are the gaps in current programming?
- What are the drivers of housing cost burden?
- What is Central Ohio’s housing investment portfolio, and what should it be?

### Perspectives

- People experiencing housing instability
- Educational institutions
- Seniors and persons living with disabilities
- Development community

### End Users

- Policymakers
- Employers (including economic development prospects)
- Media
- Local governments and other organizations creating plans/strategies within the region
Preliminary Findings

• The location of homes matters to residents of Central Ohio. Respondents believe housing should be safe and near good schools, shopping, and other amenities.

• A majority of residents living in Central Ohio own their homes (61%). It is increasingly difficult to become a homeowner in Central Ohio, especially if you are a person of color.

• Today, on average, homeowners are spending 19% of their income on housing costs while renters spend 27%.
Preliminary Findings

• Housing availability since 2011 largely kept pace with growth, but due to a tight vacancy rate (2%), **new construction will be critical** in meeting the region’s ongoing housing needs.

• **Impediments to developing more housing** include politics, policies and neighborhood perception; costs for labor and materials are also significant factors.

• A majority of developers (65%) shared that **financing and access to debt are two critical factors** in making their projects work. Local, state, and federal resources are being used to support residential development in Central Ohio.
